

**Position:** Diagnostic Radiographer**Location:** Linköping or Norrköping, Sweden

The Departments of Radiology in Region Östergötland offers a top modern workplace equipped with the latest technology, skilled colleagues and significant research. Within the departments of Radiology we can offer you a possibility to continuous update of your skills as well as in-depth knowledge. We perform leading research and have a close collaboration with Linköping University. Teamwork, continuous development and dedication are important parts of how our daily work is performed. Welcome to Region Östergötland and the Departments of Radiology!

**Information about the position:**

Are you interested in being a part of our expansive radiology departments in Region Östergötland, Sweden? We are now interested in dedicated Diagnostic radiographers. Diagnostic radiographers at our departments use x-ray machines, computerized tomography (CT) and magnetic resonance imaging (MRI) in their daily work. We are looking for diagnostic radiographers with general knowledge and also those with a special interest of mammography (both screening and diagnostic), MRI, angiography or nuclear medicine. Please, specify when applying if you have a special interest within the previously mentioned areas.

**Required profile:****Qualifications**

- A completed BSc level in diagnostic radiography.
- Experience as radiograph is an advantage but not a prerequisite.
- You'll need to have effective interpersonal and communication skills and ability to work as part of a team. You take responsibility for your work and work towards set goals. You are service minded and find it easy to solve problems.

**The company offers:****Additional information**

- Salary: 2 300 - 2 600 Euro per month (negotiable depending on previous work experience and skills).
- Date for start of employment is set upon agreement.
- Practice language is Swedish. If needed, employment will start with studies in Swedish, paid for by Region Östergötland.
- We will offer assistance during your move and acclimatization in Sweden.

You will be stationed in one of our hospitals in Linköping or Norrköping. The region offers *a high standard of living with its modern and welcoming cities, rich cultural life and great wildlife*. To learn more about the two cities and/or the region of Östergötland, please visit:
